

ALFAIZI AHMAD ZAHARAN

081949837632 | zahranalfaizi@gmail.com | Pondok Ranji, Tangerang Selatan

Summary

Information Technology undergraduate with strong interests in Hardware Engineering, Internet of Things (IoT), Embedded Systems, Linux, and Computer Networking. Experienced in Linux system administration, computer hardware maintenance, embedded sensor integration, and Python programming. Passionate about building reliable hardware-software systems, troubleshooting technical issues, and continuously learning emerging technologies.

Experience

Operating System Laboratory Teaching Assistant

Bachelor of Information Technology – Telkom University Jakarta

February 2026 - June -2026

- Assisted students during operating system laboratory sessions.
- Explained Linux and operating system concepts in a clear and structured manner.
- Guided students in troubleshooting Linux configuration and practical assignments.
- Supported laboratory activities related to system administration and operating systems.

Projects

IoT-Based Chicken Weight Sorting System | Campus-Group Project

- Developed an IoT-based chicken weight sorting system using a Load Cell sensor and HX711 amplifier module.
- Programmed the microcontroller to measure and classify chicken weight automatically.
- Performed sensor calibration and testing to improve measurement accuracy.
- Integrated hardware and software for real-time weight acquisition.
- Applied troubleshooting techniques during hardware integration and system testing.

Backend Development for Web Application | Team Project

- Developed backend functionalities using the Laravel framework.
- Designed and implemented the relational database structure based on system requirements.
- Developed CRUD features for data management.
- Created database migrations and managed application data using Eloquent ORM.
- Collaborated with team members throughout the application development process.

Technical Skills

- **Programming:** Python, C++, Laravel
- **Operating Systems:** Linux (Ubuntu), Windows
- **Hardware & IoT:** PC Assembly, Hardware Troubleshooting, Arduino, Sensor Integration
- **Networking:** TCP/IP, IP Addressing, Subnetting
- **Tools:** Git, VirtualBox, Cisco Packet Tracer

Leadership & Organizational Experience

Head of Creative Division

May 2025 – December 2025

Google Developer Group on Campus (GDGoC) Telkom University Jakarta

- Led the creative team in planning and producing digital content.
- Coordinated branding, visual design, and publication materials.
- Managed documentation for community events.

Creative Media Division

December 2024 – December 2025

Student Representative Council (DPM), Telkom University Jakarta

- Designed promotional materials for organizational events.
- Collaborated with multiple divisions to support communication campaigns.
- Managed documentation and media archives.

Operator Division

September 2025

Information Technology Student Orientation Committee

- Managed presentation slides and multimedia systems during orientation activities.
- Prepared projectors, audio equipment, and presentation materials.
- Ensured smooth technical execution throughout the event.
